Summary of the project: As a part of its “Energy for Health” program, SELCO Foundation aims to strengthen health services delivery through the deployment of Decentralized Sustainable Energy Solutions for health centers across India, thereby improving access to quality health care.

SELCO Foundation is looking to develop and design a series of four "milestone" reports that showcase Energy for Health program updates in the states of Mizoram, Meghalaya, Karnataka, and Bodoland Territorial Region in Assam where 100% primary health facilities have been solar powered and integrated with efficient med tech in partnership with respective state governments. These books will highlight the blanket coverage achieved in each state, detailing the transformative changes brought about by ENERGY for HEALTH initiatives in all 4 states/ regions. And design effective methods to outreach the same.

The coffee table books will serve as a visual and narrative representation of SELCO's work, featuring high-quality photographs, compelling stories, and detailed accounts of the positive impacts on local communities, role of champions and stakeholders. By capturing the essence of all stakeholder efforts, these books aim to inspire and inform stakeholders, partners, and public about the potential of decentralized sustainable energy solutions in driving social and economic development.

The books would also need to capture specific cultural nuance of each state in its visual language and narrative.

Audience: The coffee table books showcase the program, its progress and impact to State level health stakeholders critical in designing, implementing and sustaining Energy for Health Programs.
